

## Day 1 July 13, 2026

09:00 - 15:00 (US Eastern Time)

|                            |                                                                                                                                                                                                                                                                                               |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09:00 - 09:20              | Meeting (AV Check)                                                                                                                                                                                                                                                                            |
| 09:20 - 09:30              | Opening Remarks and Introduction                                                                                                                                                                                                                                                              |
| 09:30 - 10:00<br>(Keynote) | Title: Is there still a role for antiarrhythmic drugs in treating atrial fibrillation<br><b>Dr. Peter R. Kowey</b> , Lankenau Heart Institute, USA                                                                                                                                            |
| 10:00 - 10:30<br>(Keynote) | Title: Managing cardiogenic shock in the modern era from collapse to recovery<br><b>Dr. Debbie Rinde-Hoffman</b> , Tampa General Hospital, USA                                                                                                                                                |
| 10:30 - 11:00<br>(Keynote) | Title: Physics and engineering in cardiovascular ultrasound, arterial stiffness, and cardiovascular disease<br><b>Dr. Trevor Tucker</b> , Dynamic Vascular Resolution Inc., Canada                                                                                                            |
| 11:00 - 11:20              | Title: The dominance of old blood over young and rational paths for reversing age-related pathologies<br><b>Dr. Irina Conboy</b> , Generation Lab, Inc, USA                                                                                                                                   |
| 11:20 - 11:40              | Break                                                                                                                                                                                                                                                                                         |
| 11:40 - 12:00              | Title: The cost of delay: Liver failure and mortality after mechanical circulatory support<br><b>Kelsey Gore</b> , Ochsner Health, USA                                                                                                                                                        |
| 12:00 - 12:20              | Title: Pediatric coronary artery abnormalities: Risk stratification, imaging, and contemporary management<br><b>Dr. Tyler Fick</b> , Children's Mercy Kansas City Hospital, USA                                                                                                               |
| 12:20 - 12:40              | Title: AI-powered CT intelligence for hybrid cardiac imaging: Transforming SPECT/PET stress studies into integrated risk and ischemia platforms<br><b>Dr. James V. Cireddu</b> , University Hospitals of Cleveland, USA and <b>Jasmine A. Clough</b> , University Hospitals of Cleveland, USA |
| 12:40 - 13:00              | Title: Maternal outcomes by mode of delivery in pregnant patients with valvular heart disease: A retrospective cohort study<br><b>Dr. Heather E. Acuff</b> , University of Michigan, USA                                                                                                      |
| 13:00 - 13:20              | Title: Update on cardio-obstetric care<br><b>Dr. Afif Kraitem</b> , Vanderbilt University Medical Center, USA                                                                                                                                                                                 |
| 13:20 - 13:40              | Break                                                                                                                                                                                                                                                                                         |
| 13:40 - 14:00              | Title: Transcatheter management of failed surgical mitral valve repair: Long term outcomes<br><b>Dr. Karl Abou Zeid</b> , Houston Methodist DeBakey Heart & Vascular Center, USA                                                                                                              |
| 14:00 - 14:30<br>(Keynote) | Title: The heart knows first: AI, behaviour, and the future of cardiovascular care<br><b>Dr. Iris-Panagiota Efthymiou</b> , University of Greenwich, UK                                                                                                                                       |
| 14:30 - 15:00<br>(Keynote) | Title: Healing a broken heart with nanomedicine<br><b>Dr. Thomas J. Webster</b> , Brown University, USA                                                                                                                                                                                       |

End of Day - 1

| Day 2 July 14, 2026                |                                                                                                                                                                                                                                    |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09:00 - 12:20 (US Eastern Time)    |                                                                                                                                                                                                                                    |
| 09:00 - 09:20                      | Title: Application of cardiac shock wave therapy in coronary artery disease<br><b>Dr. Xinjian Li</b> , Cao Xian People’s Hospital, China                                                                                           |
| 09:20 - 10:00<br>(Special Session) | Title: Percutaneous coronary intervention versus optimal medical therapy in patients with chronic stable angina: A prospective cohort study<br><b>Dr. Abdul Wahed Sidiqi</b> , Kabul University of Medical Sciences, Afghanistan   |
| 10:00 - 10:20                      | Title: Beyond weight loss and diabetes control: GLP1 agonists’ role and paradigm shift in cardiovascular care<br><b>Dr. Syed Raza</b> , Awali Hospital, Bahrain                                                                    |
| 10:20 - 10:40                      | Title: Double trouble: A perfect storm of infection and hypercoagulability: Culture negative native valve endocarditis with intracardiac thrombosis and thrombophilia<br><b>Dr. Ahmed Sharaf</b> , Manchester Foundation Trust, UK |
| 10:40- 11:00                       | Break                                                                                                                                                                                                                              |
| 11:00 - 11:20                      | Title: A rare case of eosinophilic myocarditis with peripheral eosinophilia-diagnostic challenge<br><b>Dr. Pooja Deepak</b> , Princess Alexandra Hospital, UK                                                                      |
| 11:20 - 11:50<br>(Keynote)         | Title: New treatment options for the management of advanced heart failure<br><b>Dr. Leslie Miller</b> , Second Heart Assist, USA                                                                                                   |
| 11:50 - 12:10                      | Title: Pre-eclampsia management<br><b>Dr. Thomas Alne</b> , Jefferson Abington Hospital, USA                                                                                                                                       |
| 12:10 - 12:20<br>(Poster)          | Title: Disregard for an individual’s accomplishments undermines their well-being<br><b>Dr. Sofica Bistriceanu</b> , European Primary Care Cardiovascular Society, Romania                                                          |
| End of Day - 2                     |                                                                                                                                                                                                                                    |
